Product Data Sheet

Decorative Slate Aggregates (Washed & Dry)

Description

50-30mm (40mm) / 30-10mm (20mm) sized natural slate chippings available in Blue, Plum, Grey & Green colours both washed and dried from our North Wales Quarries.

Naturally flat shape providing a better coverage rate per tonne hence better value for money.

Available in bulk bags or loose.

Decorative aggregates are natural products and variations in size and colour may occur due to geographical and processing variables.

Testing information in relation to specific products and source of material is available upon request

Uses

Provides an attractive practical mulch for gardeners and landscapers.

Suitable for domestic and commercial applications including paths, driveways, flower beds & borders, rockeries, plant toppers, weed suppression, pond lining (wash prior to use), municipal car parks and footpaths, caravan parks, golf courses and cycle / forest tracks.

Key Features

- Save time – decorative aggregates tend to require much less maintenance than other garden landscaping products and will not deteriorate over time.
- Save money – decorative aggregates are actually a lot cheaper than many other landscaping products.
- Flexibility – decorative aggregates can be used in many applications large or small; paths, driveways, in flower beds, rockeries, fish ponds and as plant toppers, and commercially on road schemes as weed suppression on roundabouts and central reservations.
- Ability to create your own vision yourself.
- The aggregates are hard wearing and colour fast.
- Suitable for ponds and water features and fish friendly (wash prior to use)
- Environmentally friendly.
- Low Carbon footprint with no air miles.
- Our bulk bags can be recycled as part of your normal recycling at your local recycling centre.
